

BC-100 CAMERA

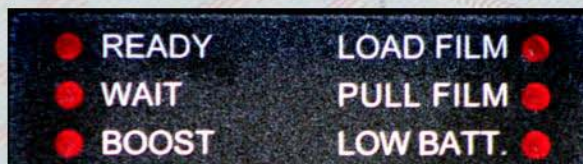

The BC-100 Passport and Identification camera incorporates the latest in microprocessor technology to help simplify the process of taking quality photos by non-professionals. The BC-100 features a built-in rechargeable battery that allows the operator the freedom to move the camera without the hindrance of a power cord. The LED readout and characters will guide you through the simple, step-by-step operation of taking pictures. The Dual Aim Lights help the operator measure the correct distance to the subject every time.

CAMERA FEATURES

- **Dual Aim Lights:** When the aim button is pressed two light beams extend out from the front of the camera
- **LED Display:** Six character readout illustrates all step-by-step functions of the camera
- **Display Features:** Pull Film Indicator, Load Film Indicator, Ready Indicator, Low Battery Indicator, & Strobe Boost Indicator.
- **Timers:** Ten timers to accommodate each sheet of instant film contained in one cartridge
- **Memory:** The camera remembers how many photos are taken and remaining
- **Recharging Cord/Power Cord:** Power cord works as both a power cord as well as a battery charger
